1 Questions

1.1 Question 1

Which course are you most excited for in your degree? Which course have you enjoyed the most so far?

I am most excited to work with hardware and am excited for the microcontrollers class I am taking this semester. I have enjoyed my Numerical methods class the most because it taught me how to write Mat LAB programs and was a cool place between interesting math and computer programming.

1.2 Question 2

Leave any feedback on the clarity of the expectations, instructions, and deliverables.

The deliverals are good! I was able to follow them well and they made sense.
